

With our varied knowledge of conductive films, plastic films, and adhesives, Tapecon has the ability to combine multiple converting techniques to fabricate intricate and unique constructions. Our R&D teams design and develop solutions to customer applications. These value-added services exemplify the commitment we have to our customers to be a full service solution to your many challenges.

**Let Tapecon
 Help With Your
 Development**

Combining diverse capabilities to manufacture constructions and products that:

- Meet demanding and complex customer specifications
- Simplify assembly and manufacturing processes
- Reduce Cost

Manufacturing products such as:

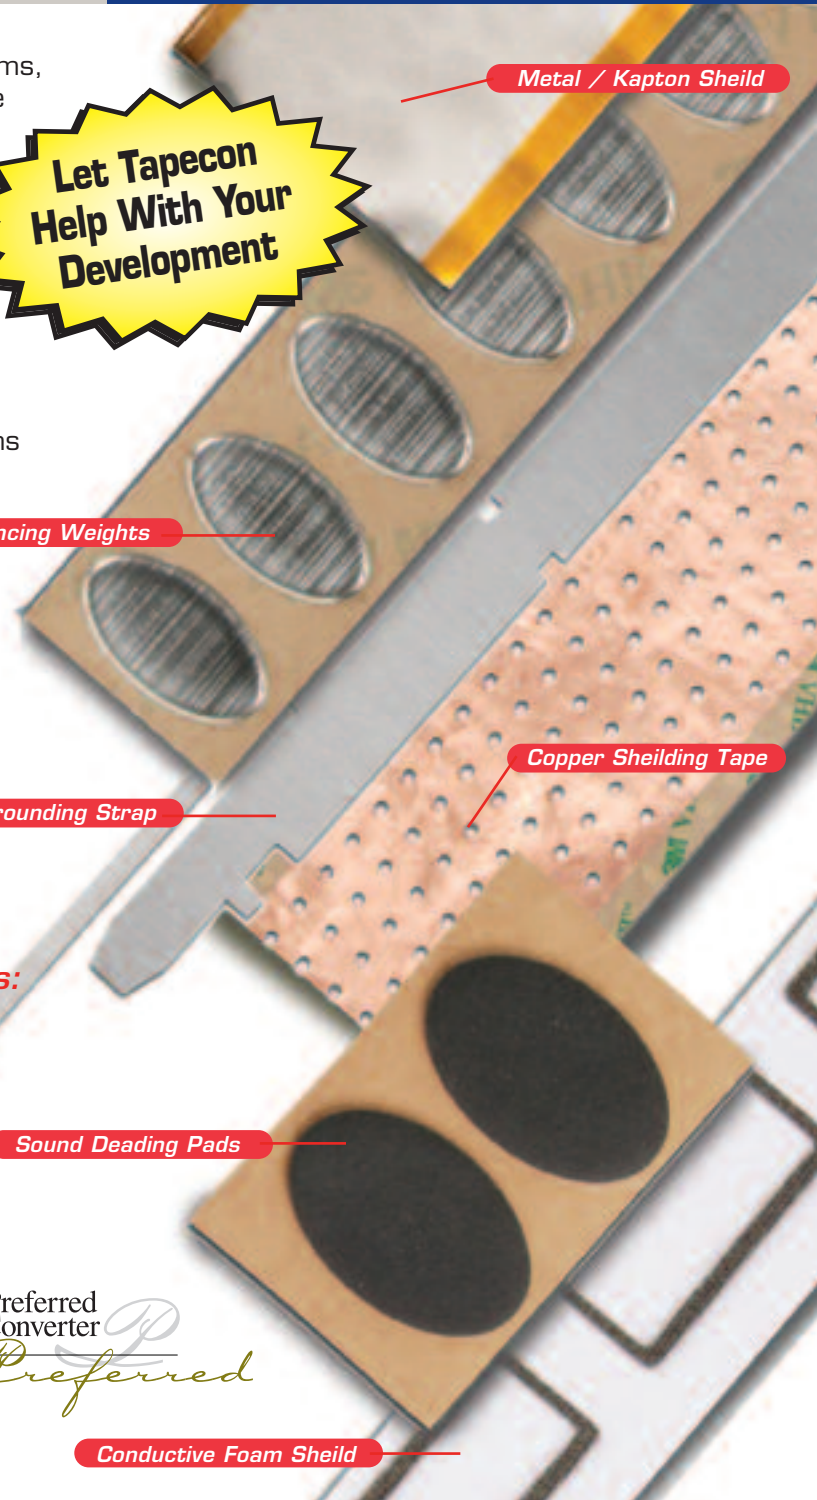

- RFI/EMI shielding tapes and laminates
- Lead attachment assemblies
- Die-cut and laminated assemblies
- Foam/foil constructions
- Electrically and thermally conductive pressure sensitive adhesive products
- Gaskets

Servicing the following markets and industries:

- Electronic assembly
- Aerospace
- Telecommunications
- Industrial
- Cable shielding
- Medical device
- OEM

Using capabilities such as:

- Laser Cutting
- Die Cutting
- Lead/wire attachments
- Combining adhesives, films, foams, and foils
- Slitting
- Laminating

Capabilities/Products

- Custom R&D Engineering
- Die Cutting Capabilities
 - Laser
 - Plotter
 - Steel Rule
 - Rotary
- Bonding With Adhesives
- Custom Assemblies
- Printing - Digital/Screen/Flexo
- Custom Soldering
- Custom Forming & Bending
- Laminating
- Zoned / Selective Adhesive
- Sheeting
- Perforating
- Custom Packaging

Tapecon is proud to be:

- Authorized 3M medical products converter
