

Value-Added Product Identification for Infusion-Type Pharmaceuticals.

The Tapecon, Inc. patented IV HANG LABEL SYSTEM will save time, labor and costs at the labeling and product dispensing levels.

Tried and tested under the most adverse conditions and handling, the IV HANG LABEL SYSTEM provides a high-quality product identification, instructional and vertical bottle suspension in an all-in-one, low-cost label.

Do it all when you apply the label. Whether it be with your existing automatic labeling equipment, or with Tapecon supplying the reliable, cost effective LABEL-AIRE systems. You're assured of a quality and cost-effective application.

The IV HANG LABEL SYSTEM is custom designed to match the size and dynamics of your bottles.

Realize These Benefits!

- Eliminates the plastic cap hanger and/or the sling
- Eliminates the capping procedure
- Enhances line speeds and automation for packaging
- Present labeling equipment can be used in most cases
- Lowers shipping weight and decreases container size and freight costs
- Lowers inventory through standardization
- Positive environmental impact by decreasing plastic usage
- Imprintable surface for most imprinting methods
- All graphics on label are protected
- **Any Vial** can be an infusion vial
- Lowers the overall production cost
- Lower down time and faster line speeds
- Higher annual production
- Better utilization of personnel
